

The 9th MINEX Europe Mining and Exploration Forum

Made in Europe™: Securing Metals and Minerals for a Sustainable Future

The **9th MINEX Europe Forum** is organised on **21-23 October 2025** at the **Lagoas Park Hotel in Lisbon** under the theme “**Made in Europe™: Securing Metals and Minerals for a Sustainable Future**”. The Forum is important Industry event organised to address practical steps in securing Europe’s critical raw materials sovereignty.

Briefly about MINEX Europe

The MINEX Europe Forum was established in 2015 to encourage cross-border and cross-sector dialogue aimed at unlocking Europe’s mineral resources and supporting the continent’s industrial revitalisation. The previous Forums were held in Czech Republic, Poland, Albania, Bulgaria, North Macedonia, Serbia and Austria. MINEX Europe brings together industry professionals, companies, and stakeholders to discuss key issues and opportunities in the European mineral & metals upstream, mid-stream and downstream supply chains.

The Forum’s significance

The endorsement of 47 strategic critical raw materials projects on 25 March 2025, presents a potentially iconic moment for Europe. However, the pressing question is whether the EU and its members will maintain the resolve needed to realise these projects by 2030, particularly in the face of a worsening global geopolitical landscape characterised by resource competition and export restrictions.

A Call to Action - Your insights are vital

Contribute to the essential conversation on securing Europe's raw materials future

Europe's long-term prosperity and strategic autonomy hinge on its ability to develop resilient, domestically controlled supply chains for critical raw materials. By cutting the red tape and actively facilitating the responsible development of new mines, Europe can reduce its overdependency, strengthen its industrial base, and ultimately secure its place as a formidable global player.

We invite **mining industry leaders, government officials, academics, technology providers, and NGOs** to share their expertise and help shape the future of responsible raw materials sourcing in Europe.

Topics of particular interest include:

- Development of European supply chains for critical raw materials.
- Powering the Future: Lithium & Battery Material Supply Chains in Europe.
- The implications of the joint purchasing platform for critical minerals and energy security in Europe.
- Europe's Mineral Sector: A Call for Pragmatic Regulation.
- Invisible Mining: Addressing EU Raw Material Challenges Through Technological Innovation.
- Building Trust: Transparency and Stakeholder Engagement in the Mineral Sector
- Innovations in mining technology, automation, and digital transformation.
- Circular Economy in Mining: Securing the Future of the European Extractive Metallurgy and Mineral Processing
- Turning the Investment Needle: Strategies for Attracting Funding to Europe's Mining Projects
